

A photograph of two women laughing joyfully. The woman on the left has short, light-colored hair and is wearing a light blue button-down shirt. The woman on the right is wearing a green headscarf and a light-colored top. They are both smiling broadly and looking at each other.

Further - Precision Cancer Service

We know that a cancer diagnosis can be life-changing, and we're here to support you every step of the way.

That's why we've partnered with Further to offer the Precision Cancer Service, giving you access to advanced genetic testing and expert advice to help guide your treatment.

The Precision Cancer Service is designed to support you in the event of an advanced or complex cancer diagnosis. The following cancers are eligible for this service:

- Cancers that haven't responded to initial treatment (as confirmed by your oncologist)
- Advanced-stage cancers (stage III or IV)
- Cancers where the original site isn't clear (cancer of unknown primary)
- Rare cancers.

If you are diagnosed with an eligible cancer, the Precision Cancer Service provides comprehensive genetic testing, known as a Somatic test.

These somatic tests are reviewed by world-leading experts who will provide a personalised report with treatment recommendations.

The service will also offer a complementary germline test if a hereditary risk is suspected in your case. If a hereditary cancer risk is identified through germline testing, Further can arrange the same test for your biological children (and, in some cases, siblings) to determine if they might also be at risk. If a clinical trial might be right for you, Further can also help you find one.

Our nurse case managers are here to guide you through your cancer treatment and provide information on your available options.

Please note:

- Some types of cancer may not be eligible for the service, depending on your scheme and any personal or scheme exclusions
- Cover for any treatment recommendations presented by this service will be subject to all scheme terms and conditions, including but not limited to, scheme exclusions and monetary limits where applicable
